

## DID YOU KNOW?

**FALLS ARE THE LEADING CAUSE OF DEATH IN CONSTRUCTION.** According to Workplace Safety and Insurance Board statistics, roughly one in six lost time injuries are the result of falls. These injuries and fatalities are preventable!

### **It's the LAW!**

If your workers face fall hazards, it is your responsibility as an employer to provide them with fall protection training and equipment.

Under Ontario's Occupational Health and Safety Act (OHSA), employers must take every reasonable precaution to protect workers from hazards. It is required by law to provide information, instruction, and supervision to ensure that workers properly use the required equipment; otherwise employers, supervisors and workers can be heavily fined and/ or prosecuted for non-compliance.

### **The Deadline to have Approved Working at Heights Training is April 1, 2017**

The Ontario Ministry of Labour (MOL) Regulation 297/13 (Occupational Health and Safety Awareness and Training) that came into effect on April 1st, 2015 states certain workers complete a working at heights training program that has been approved by the Chief Prevention Officer and delivered by an approved training provider before they can work at heights. The training requirement is for workers on construction projects who use any of the following methods of fall protection: travel restraint systems, fall restricting systems, fall arrest systems, safety nets and work belts or safety belts.

With the two-year grace period deadline for transition fast approaching, our certified FTT Instructors can assist with your training requirements in order to comply with this regulation.

**In addition to our “Industrial Fall Protection” training programs, we now offer Construction approved “Working at Heights” training.**

As in the past, you can rely on FTT’s instructors to bring your operators up to the required legal standard.

As outlined by the Ontario’s Chief Prevention Officer a maximum of 12 students for each session will be accepted – So Book Today! These programs fill up fast so confirm your seat as soon as possible.

This program will cover all aspects of Working at Heights for individuals who can fall three meters or more in the workplace.

Upon completion of the program, each student will receive a Comprehensive Working at Heights Manual and a Temporary Wallet Card. Three year wallet cards will then be issued by the CPO upon successful completion of the program is confirmed.
